

Mathematics, Grade 5

Unit I: Lesson A3

Story: **Roman Numerals**

Write a short story about a trip back in time to the Roman Empire. Use as many Roman numerals as possible in your tale. Every number, such as dates, times, addresses, and amounts, should be written with Roman numerals.

Make sure your story is at least one page or more with ten or more Roman numerals in it. Also make sure it can be easily read by the rest of the class.

Create some illustrations to go with your story and display it for the class.
