

Mathematics, Grade 5

Unit VII: Lesson B1

Game: **US Measures Concentration**

Make a card game using at least 16 cards. Write standard measures on eight of the cards. On the other eight cards, write standard measures that are equal to, but not the same as, the ones you wrote on the first cards. In other words, if you write "1 yard" on one card, then write "36 inches" on another card.

You might want to include inches, feet, yards, miles, ounces, pounds, gallons, quarts, pints, cups, and so forth.

Research the rules of the game "Concentration." Play a similar game with your classmates, using the cards you made. The winner is the player who has the most cards when no more are left on the table.
