

Social Studies, Grade 2

Unit I: Lesson B1

Graph: **Groups**

Make a list of all the groups you belong to. Stretch your mind and see how many you can list. Ask five other people to make lists like you did. Be sure to ask adults as well as other students.

Use the lists and make a graph with names on one axis and groups on another axis so you can see which groups many people belong to and which only a few belong to.

Study your graph and write several sentences or paragraphs telling what you have discovered about groups.
