

Social Studies, Grade 3
Unit VI: Lesson A1

Diagram: **Mill Design**

Research mills and imagine that you are an architect for a mill.

Draw a diagram of a factory building with a big area for machines, places for trucks to load and unload, and office space. Remember that a mill must have a source of power and easy access to a major road, and that the building must have fire exits.

Display your diagram and refer to it as you present an oral report, telling about your design.
