

Social Studies, Grade 3

Unit VI: Lesson A2

Oral Report: **Product Creation**

Brainstorm ideas for a new product. If you would find it helpful, ask other people for their suggestions.

Select one idea and make a sample from paper, fabric, wood, or pipe cleaners. In a written outline, list the resources you would need to produce the product, where the resources would be obtained, and where you would try to get this product made.

Demonstrate the sample and present the information in an oral report to the class.
