

Social Studies, Grade 6

Unit II: Lesson B4

Time Capsule: **Glimpse of Time**

With your teacher, assemble two teams of students. Each team will independently brainstorm important objects from present-day culture to create a time capsule with these objects or representations of these objects. When assembled, teams will trade time capsules.

Each team will write an essay describing the culture represented by the objects in the time capsule.

Possible ideas for future projects: creating time capsules from different parts of the world and from different historical periods. For example, create a time capsule representing the Israelites during Egyptian slavery or the exodus to the land of Canaan.
