

Social Studies, Grade 6

Unit II: Lesson C2

Book: **Natural Disaster Myths**

Research the eruption of volcanoes.

Write a myth to explain volcanoes in the context of an ancient civilization. Explain why the earth opens up and spits out fire and lava. Create artifacts to explain your myth. Create a book that tells the myth and shows pictures of your imagined artifacts. Add a second chapter to the book that explains in detail the scientific phenomena.

Add the book to your classroom library. This activity can be adapted to any natural disaster.
