

Social Studies, Grade 6

Unit III: Lesson A4

Letter: **Permafrost Solution**

Development of the northern parts of Canada is limited by many environmental factors. As an employee of the TransCanada Oil and Mineral Company, research the problems that permafrost causes in the building of roads and pipelines.

Invent solutions for some of those problems. Write your research and results in a letter to the Chairman of the Board of your company.

Share your letter with your teacher.
