

Social Studies, Grade 6

Unit III: Lesson D1

Report: **Social Welfare State?**

Locate references to determine the percent of the average Canadian citizen's income is spent on taxes and the percent of the average United States citizen's income is spent on taxes. Research the types of services, such as education, health care, social security, and disability assistance, which each government provides for their citizens.

Write a report in which you present the results of your research, including appropriate charts and graphs. Include which system you think is better, giving reasons for your choice.

Share your report with your classmates.
