

Social Studies, Grade 6  
Unit V: Lesson A1

Report: **Natural Disasters**

Research natural disasters that Middle America has suffered in recent years, such as earthquakes, volcanic eruptions and hurricanes.

Collect and create materials that illustrate these natural disasters and their effects. These could include a map pinpointing locations of disasters, news articles of recent disasters and models, posters or pictures illustrating earthquakes, volcanoes or hurricanes. Write a short report analyzing the challenges of rebuilding.

Organize your visuals and report to create an attractive bulletin board portraying your research.
