

Social Studies, Grade 6

Unit V: Lesson C2

Display: **Currency Exchange**

Research the basic monetary units for each country in Central America. Investigate the current exchange rate between each country's currency and United States dollars (USD). Calculate the amount of local currency a person would get for 5 USD.

Collect actual coins from as many countries as you can. Make replicas for the rest.

Display your collection with labels showing the value of each currency in USD.
