

Social Studies, Grade 6

Unit VII: Lesson A10

Bulletin Board: **Tin Production**

Research the production of tin in Bolivia and other places around the world. Also research the compounds and metals that use tin as a component. Brainstorm a list of all the products that use tin.

Design a bulletin board with a world map in the center, and identify and pinpoint the places where tin is mined. Around the outside border of the bulletin board, display pictures or objects that illustrate items on your list.
