

Mathematics, Grade 8
Unit VI: Lesson 2

Story: **Integer Chaos**

Review the properties of integers.

Control is a group in charge of the world. Chaos is out to negate that control. Create a story using integers to illustrate the unique properties of integers. The story could have a plot like this:

Chaos has successfully planted a spy to sabotage the operations of Control by doing the exact opposite of what Control says.

If you prefer, choose a different situation involving topics such as Star Wars, sports, or weather.

Read your story to the class.
