

Mathematics, Algebra I

Unit II: Lesson C1

Problems: **On Your Own**

Analyze several word problems in your textbook that use equations.

Write a word problem for each of the classes you are taking this year, such as:

English: Fry's readability index

Typing: Net words per minute; number of words per page

P.E.: Track and field records; wins and losses

Make sure that the problem can be solved using equations.

Challenge other students to solve your problems. Be prepared to help if necessary.
