Mathematics, Algebra I
Unit VIII: Lesson 1   Trig. Table: **In the Footsteps of Hipparchus**

Research how the tangent ratio of angles can be calculated by the use of a convergent series.

Create and compare several tables of tangent values of angles from 0° to 90°. For each table, use a different number of terms in the series.

Make a poster of each table for classroom use. Write a report of the merits of each.
