

Mathematics, Algebra I
Unit VIII: Lesson 3

Memory Device: **Sing a Song of Trig.**

Interview math teachers and investigate several sources to find various mnemonic devices to aid in the learning of the trigonometric ratios, such as SOH CAH TOA (Some Old Horse Caught Another Horse Taking Oats Away.)

Make a collection of these memory aids and write two of your own. Choose one or two and compose a song to aid in memorizing these trigonometric function definitions.

Arrange with the teacher to perform this song for a class studying this topic. Provide a copy of the words to the class members.
