

Mathematics, Grade 5

Unit I: Lesson B1

Timeline: **Comparing Numbers with a Timeline**

Make a timeline for the years 1800 to 1900. Research dates for a timeline. Include at least five scientific inventions during this period. Explain each invention on the timeline, and explain the importance of each. Include the names of the inventors. Also include any other important events during that time.

Display your timeline to the class when you are finished.
