

Mathematics, Grade 5

Unit III: Lesson A6

Timeline / Essay: **Your Decimal Life**

Make a simplified time line of your own life. Divide your life story into sections or periods. Note by each period what decimal value that period was of your whole life.

At the bottom of your time line, combine different periods and groups of periods into logical sets. Show the decimal value each combined set. Show your work.

Finally, comment in an essay on whether you think certain portions of your life have been well spent. Are you satisfied with the amount of time you've spent on each period and set? Why or why not?

Ask the teacher where you can display your time line and essay when you are finished.
