

Mathematics, Grade 5

Unit IV: Lesson B1

Timeline / Essay: **Your Fraction Life**

Make a simplified time line of your own life. Divide your life story into sections or periods. Note by each period what fraction of your whole life that period represents.

At the bottom of your time line, combine different periods and groups of periods into logical sets. Show the fraction of each combined set. Show your work.

Finally, comment in an essay on whether you think certain fractions of your life have been well spent. Are you satisfied with the amount of time you've spent on each period and set? Why or why not?

Ask the teacher where you can display your time line and essay when you are finished.
