

Mathematics, Grade 5
Unit VI: Lesson B1

Game: **Geometry Bingo**

Make a bingo game in which each square of the game card is covered by a different geometric shape.

Make enough game cards for several people to play. Remember, each card should have many of the same shapes as the other cards, but in a different order. Some of the shapes should be unique to each card.

Play the game with several people. When the leader calls out a space, he or she should say something like, "B polygon."
