

Mathematics, Grade 5  
Unit VIII: Lesson B2

Display: Circle Graph?

Find an example of a circle graph in a newspaper or magazine. Cut out the graph and glue it to a sheet of construction paper. Write a description of what each part of the graph shows.

At the bottom of the paper, write several questions that can only be answered by studying the graph.

Display your graph somewhere in the classroom. You may want to offer a prize to the first person who can solve all the questions on your display correctly. Make the questions difficult enough so that they are not solved too quickly!
