

Social Studies, Grade 2

Unit I: Lesson B3

Maps: **Neighborhoods**

Make a map of your neighborhood, and then make a map of a neighborhood in your community that is different from yours. Your maps should show houses, stores, parks and other important things in each neighborhood. Be sure each map has a clear key.

Study your two maps to see what differences there are between the two neighborhoods. Think about why the differences exist. Write a report that tells what the differences are between the two neighborhoods. Include several sentences or paragraphs that give reasons for those differences.

Display your maps and the report.
