

Social Studies, Grade 2

Unit III: Lesson B1

Flowchart: **Ten Jobs from One**

Call the Chamber of Commerce to learn about several of the main industries in your community.

Select one industry. Brainstorm with other students and/or your teacher. What service and production jobs depend on that industry? Imagine that you can follow one dollar bill that an employee of the industry is paid as the dollar is spent over and over again.

Draw a large diagram or flow chart showing how the money paid by the industry also supports many other jobs in the community. Include drawings showing at least ten different jobs. Display the diagram in the classroom.
