

Social Studies, Grade 2

Unit III: Lesson B2

Pictures: **Before and After Industry**

Ask your parents, teachers or other adults which industries are most important to your community.

Pretend that those industries closed down. Imagine how the community would change.

Draw two large, detailed before and after pictures. One picture should show how the people in the community lived while many people were working in the industries. The other picture should show how the community was different after the industries closed down and the people didn't have jobs anymore.
