

Social Studies, Grade 3

Unit I: Lesson C1

Role-play: **Visitor's Center**

Choose a city to research. Understand what resources and activities draw people to that area.

With another student, determine what could be shared about the city's location, natural resources, and transportation that would make it an interesting place to visit. Also determine what good questions could be asked about the city to help visitors focus on its qualities.

With the other student, act out a role-play for the class in which a visitor asks a resident good questions about the city and the resident answers.
