

Social Studies, Grade 8

Unit IX: Lesson B2

Chart: **Works Progress Administration**

Research the Works Progress Administration that was set up by Franklin D. Roosevelt's administration. Investigate what projects were undertaken by the WPA in your area. Some resources you might want to use in addition to the Internet are public records, newspapers of the period, and the political science department of a nearby university or college.

List the projects that were undertaken on a large chart and illustrate the chart if possible. Show how we continue to benefit from these projects today.

Share your chart with the class.
