

Social Studies, Grade 7

Unit III: Lesson D5

Invention: **Hurricane Damage Prevention**

A major environmental threat to the Caribbean region is from hurricanes. Research the causes of hurricanes, the results of several major hurricanes, current methods of preventing damage from hurricanes, and attempts made to reduce the strength of individual storms.

Design some invention to help prevent hurricane damage.

Write a grant proposal asking for \$2 billion of government funds to further develop your invention and, using data from your research, show how your invention is worth the money you are requesting.
